Problem

Emergency spill kits need to be kept in good order to ensure that if ever a spill occurs there is product available to quickly respond to it.

Always remember **PREVENTION IS BETTER THAN CURE**

Solution

Spill kits are designed to contain and clean up spillages and limit environmental damage. They allow you to effectively respond to any oil, chemical or general liquid spills and are available in carry bags, wheelie bin, static and mobile lockers with different capacities capable of dealing with a small spill to worst case scenario.

Regular audit checks need to be part of your operating procedure and form part of an emergency spill action plan.
