

To Stack Or Not To Stack, That Is The Question ?

Problem

IBC's full with acids, double stacked with no provision for bunding. Surrounding floor area showed clear evidence of leaks from over spills as well as liquid entering into the storm water drain resulting in contamination of the drainage system

Solution

Enpac EN-5469-YE IBC spill pallet is specifically designed to allow for two IBC's to be safely stacked on top of the sump. Total load capacity 3629kgs, containment capacity 1457litres
