

## Who Forgot To Close The Shutter Door ?

### **Problem**

This customer showed initiative by fitting their diesel fuel pump into a metal casing fitted with a padlock for security, unfortunately nobody thought to close the door at the end of the day which would have:

- A) Provided security and prevented the possible theft of fuel
- B) Rainwater entering the sump causing it to overflow and contaminate the surrounding area with contaminated water contaminated with fuel waste
- C) Stopped the use of the cabinet as a waste bin

### **Solution**

Close and secure the shutter door with the padlock

### **Fosse Ltd**
